# EMPATHY MAP

PROJECT TITLE	Early Detection of Chronic Kidney Disease using Machine Learning.

SAYS

- I want the result to be above 95% accurate.
- The overall process should be easy to complete.
- The results should be generated faster and handled out easily.
- Everybody should be able to access it via gadgets.

THINKS

- May think it's innacurate.
- Sometimes it may report wrong as CKD.
- Does not believe in online reports.
- Thinks of wasting too much time.

CHRONIC KIDNEY DISEASE

DOES

- Does multiple tests to get accurate results.
- Shares the results with others.
- Checks everyday in online about health conditions.
- Adapts to healthy Lifestyle.

FEELS

- Negative Thoughts.
- Can I trust these predictions?
- Will I ever be cured?
- Fear, Confused, Nervous, Satisfaction.

PAIN

- What if the result is positive?
- Thanatophobia - Fear of Death.
- Health Issues, Weakness.
- Loses Hope.

GAIN

- Will be able to live longer.
- Gets right treatment like Dialysis.
- Feeling confident being Disease-Free.
- Can lead a stressfree life without worrying about disease.
